

Data sheet quadax® - double flange butterfly valve

body details

butterfly valve:	bare shaft
pressure range:	0-2320 psi
nominal size:	2"-70"
connection:	flange
body materials:	carbon steel, stainless steel, special material (duplex, inconel, bronze)
valve seat materials:	inconel, others on request
seal materials:	stainless steel with or without laminated graphite, inconel, PTFE

The body materials listed above are in contact with the media.

details needed

size
pipe connection
operating pressure
flow rate
Δp
closing time
media
process temperature
ambient temperature

The valves' technical design is based on media and application requirements. This can lead to deviations from the general specifications shown on the data sheet with regards to the design, sealing materials and characteristics.

If order or application specifications are incomplete or imprecise there is the potential for an incorrect technical design of the valve for the required application. As a consequence, the physical and / or chemical properties of the materials or seals used, may not be suitable for the intended application.

general specifications

ports	flange	ANSI 150 / 300 / 600 / 900
function		depending upon actuator
pressure range	body pressure	0 to 2320 psi
	Δp standard shaft	754 psi in both directions
	Δp optional shaft	1450 psi in both directions
Cv value	gal/min	see table
		zero-leakage per API 6D and
		API 598 resilient in both
leakage rate		direction; fire-safe per
		API 607 6th edition
flow direction		indicated by arrow on body of valve
switching time		depending upon actuator
temperature range	standard	+14°F to +842°F
	with special materials	-454°F to +1472°F
limit switches		depending upon actuator
approvals		PED / Fire safe / BAM / TA
		Luft / ATEX
weight	lbs	see table
additional equipment		upon request
